

8510 - WELLNESS

As required by law, the Board of Education establishes the following wellness policy for the District as a part of a comprehensive wellness initiative.

The Board recognizes that good nutrition and regular physical activity affect the health and well-being of the District's students. Furthermore, research suggests that there is a positive correlation between a student's health and well-being and his/her ability to learn. Moreover, schools can play an important role in the developmental process by which students establish their health and nutrition habits by providing nutritious meals and snacks through the schools' meal programs, by supporting the development of good eating habits, and by promoting increased physical activity both in and out of school.

Schools alone, however, cannot develop in students healthy behaviors and habits with regard to eating and exercise. It will be necessary for not only the staff, but also parents and the public at large to be involved in a community-wide effort to promote, support, and model such healthy behaviors and habits.

The Board sets the following goals in an effort to enable students to establish good health and nutrition habits:

- A. With regard to nutrition education, the District shall:
 1. Nutrition education shall be included in the Health curriculum so that instruction is sequential and standards-based and provides students with the knowledge, attitudes, and skills necessary to lead healthy lives.
 2. Nutrition education shall be included in the sequential, comprehensive Health curriculum in accordance with the curriculum standards and benchmarks established by the State.
 3. Nutrition education shall be integrated into other subject areas of the curriculum, when appropriate, to complement, but not replace, the standards and benchmarks for health education.
 4. Nutrition education posters, such as the Food Pyramid Guide, will be displayed in the cafeteria.
- B. With regard to physical activity, the District shall:
 1. **Physical Education**
 - a. A sequential, comprehensive physical education program shall be provided for students in K-12 in accordance with the physical education academic content standards and benchmarks adopted by the State.

- b. The physical education curriculum shall provide sequential instruction related to the knowledge, attitudes, and skills necessary to participate in lifelong, health-enhancing physical activity.
- c. The sequential, comprehensive physical education curriculum shall stress the importance of remaining physically active for life.
- d. The K-12 program shall include instruction in physical education as well as opportunities to participate in competitive and non-competitive team sports to encourage lifelong physical activity.
- e. On an annual basis, physical education teachers shall review and affirm receipt of the Ohio Department of Health's concussion information sheet.

2. **Physical Activity**

- a. Physical activity and movement shall be integrated, when possible, across the curricula and throughout the school day.
- b. The school shall provide information to families to encourage and assist them in their efforts to incorporate physical activity into their children's daily lives.
- c. The school shall encourage families and community organizations to help develop and institute programs that support physical activity of all sorts.

C. With regard to other school-based activities the District shall:

- 1. The schools shall schedule mealtimes so there is minimum disruption by bus schedules, recess, and other special programs or events.
- 2. The school shall provide attractive, clean environments in which the students eat.

Furthermore, with the objectives of enhancing student health and well being, and reducing childhood obesity, the following guidelines are established:

- A. In accordance with Policy [8500](#), entitled Food Service, the food service program shall comply with Federal and State regulations pertaining to the selection, preparation, consumption, and disposal of food and beverages as well as to the fiscal management of the program.
- B. As set forth in Policy [8531](#), entitled Free and Reduced Price Meals, the guidelines for reimbursable school meals are not less restrictive than the guidelines issued by the U.S. Department of Agriculture (USDA).
- C. The food service program will strive to be financially self-supporting; however, if it is necessary to subsidize the operation, it will not be through the sale of foods with minimal nutritious value.
- D. The food service program will provide all students affordable access to the varied and nutritious foods they need to be healthy and to learn well.

The Board designates the Superintendent as the individual charged with operational responsibility for measuring and evaluating the District's implementation and progress under this policy. The Superintendent shall develop administrative guidelines necessary to implement this policy.

The Superintendent shall appoint a District-wide Wellness Committee that includes parents, students, representatives of the school food authority, educational staff (including physical education teachers), school health professionals, members of the public, and school administrators to oversee development, implementation, evaluation and periodic update of this policy. The Wellness Committee shall be an ad hoc committee with members recruited and appointed annually.

The Wellness Committee shall be responsible for:

- A. assessment of the current school environment;
- B. review of the District's Wellness policy;
- C. presentation of the Wellness policy to the Board for approval;
- D. measurement of the implementation of the policy; and
- E. recommendation for the revision of the policy, is necessary.

Before the end of each school year, the Wellness Committee shall recommend to the Superintendent any revisions to the policy it deems necessary and/or appropriate.

The Superintendent shall report annually to the Board on the Wellness Committee's progress and on its evaluation of the policy's implementation and areas for improvement, including status of compliance by individual schools and progress made in attaining the policy's goals.

The Superintendent is also responsible for informing the public, including parents, students and community members, on the content and implementation of this policy. In order to inform the public, the Superintendent shall distribute information at the beginning of the school year to families of school children.
